## Loci and Constructions GCSE Questions

1. There are two TV transmitters on an island.

The transmitter at A has a range of 40 km .
The transmitter at $B$ has a range of 60 km .

Show clearly the area in which the signal from both transmitters can be received.
(Total 3 marks)
2. The quadrilateral $D E F G$ is a scale drawing of a field.

The line $G H$ bisects angle $D G F$.

Scale:
1 cm represents 10 m
(a) Construct the locus of points in the field which are 40 m from $E$.
(b) Shade the area of the field which is more than 40 m from $E$ and nearer to $D G$ than to $G F$.
3. $A B$ and $A C$ represent two walls.

A mast is to be erected that is
equidistant from $A B$ and $A C$
between 40 m and 70 m from $A$.
Scale: 1 cm represents 10 m

Show clearly all the possible positions of the mast.
(Total 3 marks)
4.
(b) Two lifeboat stations $A$ and $B$ receive a distress call from a boat. The boat is within 6 kilometres of station $A$.
The boat is within 8 kilometres of station $B$.
Shade the possible area in which the boat could be.
Scale: 1 cm represents
1 km

## SEA

Coastline

(Total 2 marks)
5. The diagram shows an $L$ shape.

Draw the locus of all points 2 cm from the $L$ shape.
6. The map below shows three boats, $A, B$ and $C$, on a lake.

Along one edge of the lake there is a straight path.
Treasure lies at the bottom of the lake.

The treasure is:
between 150 m and 250 m from $B$, nearer to $A$ than $C$,
more than 100 m from the path.

Scale: 1 cm represents 50 m

Using a ruler and compasses only, shade the region in which the treasure lies.
You must show clearly all your construction arcs.
7. The diagram shows three towns $A, B$ and $C$.

1 cm represents 2 km .
Show on the diagram the region which is less than 10 km from all three towns.

Scale: 1 cm represents 2 km

(Total 3 marks)
8. $A B C D$ is a square of side 8 cm .

Show clearly the region inside the square that is both closer to the point $D$ than to the point $A$, and closer to the side $C D$ than the side $A D$.
9. The diagram shows a quadrilateral $P Q R S$.

(a) Draw the locus of points that are the same distance from $P$ as from $Q$.
(b) Shade the region inside the quadrilateral which is less than 7 cm from $S$ and nearer to $Q$ than to $P$.
